### BUSINESS REVIEW

During the period under review, on the back of the application of a patent with cross-industry practical value and an internationally recognised anti-counterfeiting comprehensive solution (the “**Anti-counterfeiting Devices + Lottery**” Products”), the Group’s marketing team continued to develop potential markets and began to bear fruit. Tea leaves and natural food as well as cosmetics e-commerce platform enterprises in Mainland China showed recognition for our “Anti-counterfeiting Devices + Lottery” Products and formed strategic cooperation with the Group while the first batch of order has been secured pursuant to the cooperation. In addition to applying “Anti-counterfeiting Devices + Lottery” Products to its products, the tea leaves enterprise will also promote “Anti-counterfeiting Devices + Lottery” Products to enterprises of the same business which use the National Geographical Indications of Agricultural Products of the same category, thereby further enhancing the influence of the “Anti-counterfeiting Devices + Lottery” Products. Similar to the thriving cosmetics e-commerce industry and cosmetics consumption with strong growth momentum in the Mainland, they can effectively utilise the interaction between anti-counterfeiting and marketing functions in “Anti-counterfeiting Devices + Lottery” Products, to drive real demand. The increased sales of the consumer products using “Anti-counterfeiting Devices + Lottery” Products can boost the volume and extend market reach for the bundled “Anti-counterfeiting Devices + Lottery” Products.

The Group was granted the right to use the patent and integrates the unique anti-counterfeiting lottery packaging solution into “Anti-counterfeiting Devices + Lottery” Products. Its intrinsic advanced encryption technology and innovative anti-counterfeiting system represent the core values and underlying drives of “Anti-counterfeiting Devices + Lottery” Products’ continuous market penetration. During the period under review, such patented technology won a Gold Award in “advertisement, printing and packaging category” at the “2021 Special Edition of the Geneva International Exhibition of Inventions”, the world’s largest innovation exhibition and was commended by the Hong Kong SAR Government.

During the period under review, supply of upstream raw materials in the personal protective equipment industry chain was abundant, while Hong Kong market demand for medical protective equipment was stable during the pandemic. The Group’s personal protective equipment business carried on its operation and ensured a stable product supply for major institutional customers, while continuing to distribute personal protective equipment to individual consumers to meet citizens’ demands in the retail market. Meanwhile, revenue from the personal protective equipment business was still making contribution to the Group’s revenue during the period under review.

#### **Acquisition of Equity Interest in Target Company and Continuing Connected Transaction**

Reference is made to the announcement dated 18 February 2021. On 17 February 2021, an indirect wholly-owned subsidiary of the Group (as the purchaser), and the vendor, entered into a sale and purchase agreement in relation to a potential acquisition, pursuant to which the purchaser conditionally agreed to acquire, and the vendor conditionally agreed to sell 25% of the issued share capital of the target company upon completion of the reorganisation, at the consideration of HK\$200 million. The business of the acquired target group held by the vendor includes licensing its intellectual properties and provision of services of design, production and customisation of anti-counterfeiting devices. The patented and innovative anti-counterfeiting solution owned by the target group features a lottery ticket component with uniqueness and credibility which is easily recognised by consumers, while also possesses marketing functions and public welfare elements. It is expected that the acquisition will enable the Group to establish a long-term cooperative and licensing relationship with the vendor and obtain investment returns.

Meanwhile, a company under the target group and an indirect wholly-owned subsidiary of the Group, based on the business cooperation project on “Anti-counterfeiting Devices + Lottery” Products, entered into a conditional licensing and master service agreement in relation to the licensing arrangement and the anti-counterfeiting device services. The transactions contemplated under the licensing and master service agreement shall constitute continuing connected transaction of the Company. The effectiveness of the licensing and master services agreement and completion of the sale and purchase agreement shall be inter-conditional upon each other. As of the date of this announcement, the fulfilment of the conditions precedent to the acquisition has not been completed.

## **FUTURE OUTLOOK**

According to The Panoramic Research and Development Strategy Research Consulting Report on the PRC Anti-Counterfeiting Industry for 2021 to 2026 (《中國防偽行業深度分析及發展戰略研究諮詢報告 (2021–2026版)》) issued in January 2021, demand for the anti-counterfeiting technology has been continuously expanding and monetizing, and its application has been increasingly applied across the wide range of sectors and industries in various consumer goods such as food, medicine, tobacco and alcoholic beverages in the PRC. It is expected that the anti-counterfeiting market size of the PRC will reach approximately RMB350 billion by 2025, representing a significant growth of approximately 66.67% from 2020. The Group is seizing the opportunity to expand its market share in the anti-counterfeiting sector in the PRC.

“Anti-counterfeiting Devices + Lottery” Products possess anti-counterfeiting and marketing characteristics with cross-industry practical value, and the Group is leveraging such features to cover wider fields.
